INTERNSHIP COMPLETION LETTER

Date:- 20-03-2024

To,

Head of Department,
Tuwa Engineering College,
Godhra,
Panchmahals. GUJARAT

As per the requirement from the college regarding the Internship, we have provided an internship to:-

Name	*Nidhiben N Parmar*
Enr. No.	*210550107503*
Student of	*Bachelor in Computer Science and Engineering*
College	*Engineering College Tuwa,Godhra,*
Place	*Panchmahals. GUJARAT*
From	*16-01-2024*
To	*20-04-2024*

This is to certify that Nidhiben N Parmar, a student of Engineering College Tuwa is pursuing her internship in the field of Web Designing & UX from 16th January 2024 to be ongoing under the guidance of Mr. Veer.

During the internship, she Learned HTML, CSS, Css Advance, Adobe, Figma, & many more related concepts which require in Web Designing & UX.

Additionally, she is contributing to the construction of Application UI mechanisms and the Graphics of efficient payment systems.

During the period of her internship program with us, she had been exposed to different processes and was found diligent, hardworking, and inquisitive.

We wish her all the best in his future endeavor.

*Guide has to sign the certificate, Only if all above activities has been Completed.

ACKNOWLEDGEMENT

"I wish to extend my special thanks to V-Ex Tech for giving me an opportunity to do this wonderful Internship on WEB DESIGNING.

This is My Internship Training Report after Completion of Internship Training at **V-Ex Tech Solution**. I wish to express My Sincere thanks to my Internal Guide Asst. Prof. Rajni singh, Head of the Department of Computer Engineering Department for giving me support and the necessary suggestions and advices.

I Especially Thank My Supervisor, **Mr. Veer Agraval sir**, for constantly guiding and supporting me throughout the Training. My Heartfelt Gratitude also goes out to all the staff and employees **V-Ex Tech Solution** for Cooperating with me and guiding me throughout My Internship.

"And I would also like to thank my parents and friends who helped me a lot in finalizing this project within the limited time frame. I appreciate the guidance given by **The Team V-Ex Tech solution** for the internship"

Thank you!!!

Parmar Nidhiben N

ABSTRACT

Web design is the art of planning and arranging content on a website so that it can be shared and accessed online with the world. A combination of aesthetic and functional elements, web design is a type of digital design that determines the look of a website—such as its colors, fonts, graphics and user interface.

Today, creating a website is one of the pillars of having an online presence. Because of this, the world of web design is as dynamic as ever. It is constantly evolving, Including mobile apps and user interface design, to meet the growing needs of website owners and visitors alike.

Web design is often a collaborative process that combines knowledge and tools from related industries, ranging from web design statistics and UX. Web designers will often bring together professionals from these areas who can optimize performance and focus on the larger process and outcome.

CHAPTER 1: OVERVIEW OF THE COMPANY

COMPANY PROFILE :

Company Name: V-Ex Tech Solution

Website: https://V-Ex Tech software solution

Email id: hrteam@v-extechsolution.in

Address: 301,Dhun Complex Nizampura,Opp Pavan Park Society,Nava yard Road,Above Riya Bridal vadodara-390002

ABOUT COMPANY :

V-Ex Tech is an ISO Certified software consulting & service Company. V-Ex tech is Having Strong Experience of 16+ Years in designing software & create dynamic web pages, creating admin penal with back-end.

It Is a part of V-Ex tech, which is in existence since 2001.it is having software company in Vadodara (Gujarat).

They have Specialties on Time Punctuality, Easy to Use, Best Management, Good Concept, Web Development, Front-End / Back-End and Full Stack and Data Analytics.

V-Ex Tech is delivering software solutions across industry verticals like banking, finance, spanning from large multinational corporation to small, medium & large enterprises located in USA, Canada, UK, Europe, Africa and Australia.

SERVICE OF COMPANY :

Full-Stack Development: V-EX Tech Solution is a leading provider of full stack developer services, offering clients end-to-end development solutions for web and mobile applications. The company is headquartered in Vadodara, with a team of experienced developers and designers who specialize in building custom applications using the latest technologies and frameworks.

Data Analytics: V-Ex Tech Solution also provides services of data analytics. Data analytics typically involves four main stages: data collection, data processing, data analysis, and data visualization.

Python Programming: V-EX Tech Solutions is a software development company that provides Python programming services to clients worldwide. The company has a team of experienced Python developers who specialize in building high-quality, scalable, and robust software solutions.

Web Design and Development: The company's web development services include front-end and back-end development, e-commerce development, and CMS development. They have experience working with a variety of content management systems.

PHP Laravel: V-EX Tech Solution offers a wide range of PHP Laravel services, including custom web application development, e-commerce development, CMS development, and API development.

React JS or Node JS Development: V-EX Tech Solution is a company that provides ReactJS and NodeJS services is likely a web development company that specializes in building web applications using these technologies. ReactJS is a JavaScript library that is used for building user interfaces, while NodeJS is a runtime environment for executing JavaScript code outside of a web browser.

SCOPE OF WORK

They provide reasonably priced services for web development, eCommerce website design, website makeover, SEO, and email marketing. Their goal is to create a website that is usable in a variety of settings that is professional, creative, and user-friendly.

They are here to assist you in getting a high-quality, inexpensive website that is simple to update. Their clients can manage their own web updates from anywhere in the world using their easy-to-use online content management system (CMS), even without any prior knowledge of website design.

VALUES

Innovation: It often prioritize innovation and pushing the boundaries of what is possible with technology. This may involve experimenting with new technologies or finding creative solutions to problems.

Customer-centricity: Many companies prioritize their customers' needs and strive to provide excellent customer service. They may seek feedback and adjust their products or services accordingly to meet their customers' needs.

Collaboration: It often value collaboration and teamwork. This may involve working across different departments, partnering with other companies, or collaborating with customers.

Social responsibility: Social responsibility and may take steps to reduce their environmental impact, promote diversity and inclusion, or support local communities.

CHAPTER 2: INTRODUCTION TO INTERNSHIP

Internship Summary:

As a Web designing Intern, my primary responsibility was to work on designing web applications. During my internship, I gained hands-on experience in different programming languages such as HTML, CSS, CSS Advance and Tools like Adobe and Figma.

During the starting of internship, I learned HTML, CSS, and creating landing Page of food shop and simple functionality website as tasks. Then I worked on project which is designed using Figma. In Front-end using Figma designing tool I learned to develop dynamic and interactive user interfaces, which turned out to be great experience.

Throughout my internship, I collaborated with the team to understand client requirements, create detailed project plans, and implement best practices in software development.

Overall, my Web Designing Internship provided me with a comprehensive understanding of the designing process and helped me gain valuable skills that I will be able to apply in my future career as a software designer.

PURPOSE

- To provide you with practical experience in designing websites.
- To help you gain proficiency in HTML CSS and Figma designing tool, which are popular and in-demand technologies in the web designing industry.
- To help you to widen your perspective and creativity in designing,
- To help you develop a strong understanding of modern web designing best practices, including responsive design, accessibility, and security.

OBJECTIVES :

- To gain experience in front-end and back-end web designing, including programming languages such as HTML, CSS, CSS Advance, and Figma the designing tool.
- To gain practical experience in designing web applications.
- To learn about emerging trends and best practices in web designing,including new technologies, tools, and frameworks.

SCOPE :

- Learning and applying designing skills
- Working on projects and gaining hands-on experience
- Collaborating with cross-functional teams
- Improving project management skills
- Building a portfolio of projects

MY ROLE :

- Designing: Worked on the designing of the Website.
- Problem-Solving: Demonstrated strong problem-solving and analytical skills to overcome technical challenges.
- Continuous Learning: Pursued continuous learning through Google, documentation.
- Performance Optimization: Optimized the application's performance and scalability for improved user experience.

TECHNOLOGIES USED

- Frontend: HTML/CSS/CSS Advance, Figma
- Backend: Figma
- Development Tools: Visual Studio Code

INTERNSHIP PLANNING

Internship Development Approach and Justification

- Before The Starting of Internship, Interns should have the knowledge about His/Her choosed Technology.
- A Successful Internship requires not only a good deal of effort on the side of The Intern, but managers and supervisors most also put in some work to ensure that the Intern gets a meaningful experience.
- The Key is to Accept Responsibility when things don't go as planned. taking ownership and articulating possible solutions will result in faster resolution and enable others to see us as a Leader.
- On behalf of students, we are always working with them on things they can do to become a better intern. For example, we talk about the values and skills that employers look for in a good intern

Internship Effort and Time

- As an Intern, I have gained the experience of Live Project & How to work in Hectic Situation.
- I conduct Myself in a professional manner at all times and this is the role and responsibility of an Intern.
- Develop a respectful and co-operative relationship with the company mentors and the other interns at the working place.
- Always be punctual to work and always behave in an ethical manner.
- Completed My Internship in Web Designing in 12 weeks of time period.

CHAPTER 3: WORK OF INTERNSHIP

TASK 1: LANDING PAGE

Output:

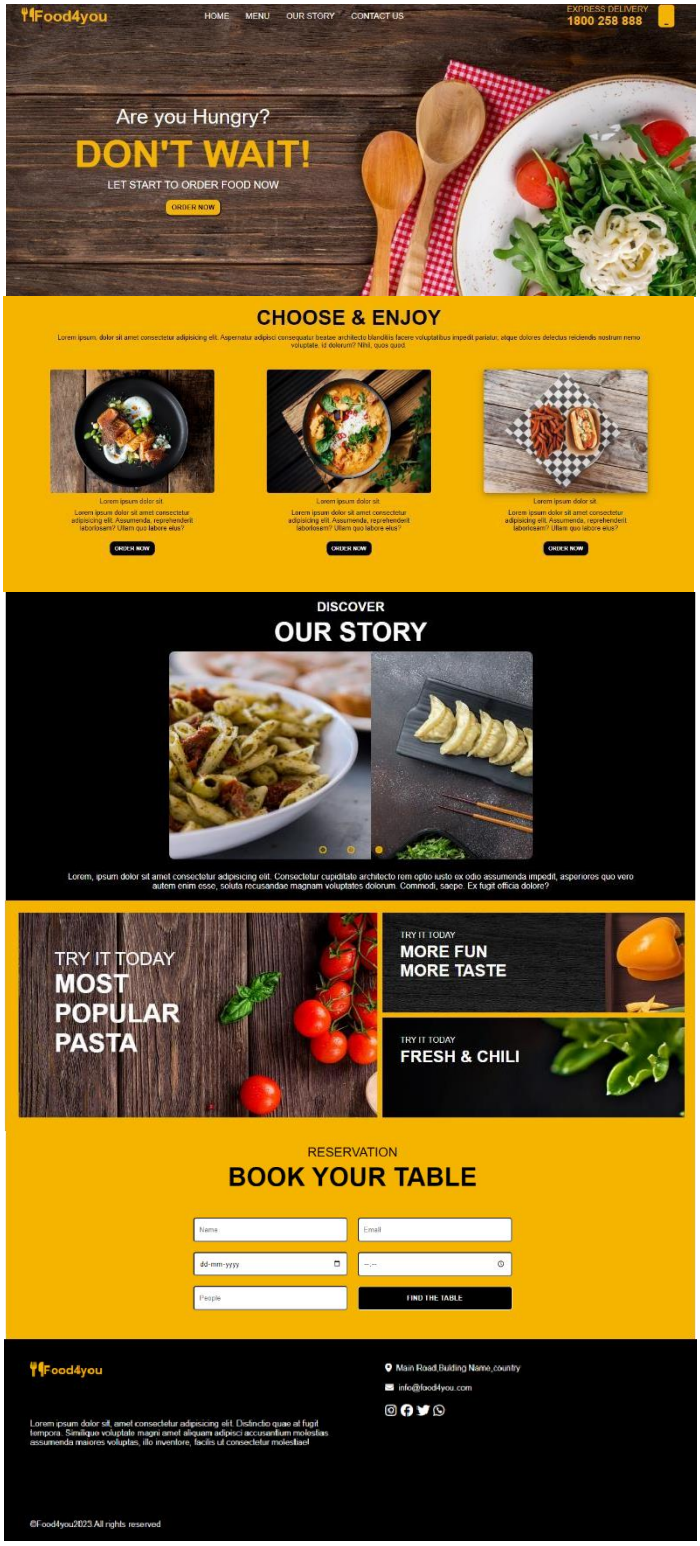

fig 3.1.1 Landing page

Explanation:

- This task of Landing Page creates using HTML, CSS, and JavaScript.
- Landing Page involved navigation bar, main page, simple slider, form section, and footer part.
- By creating this landing Page I learned important concepts of HTML,and CSS such as HTML form, flexbox CSS, etc.

TASK 2: SIMPLE WEBSITE

Output:

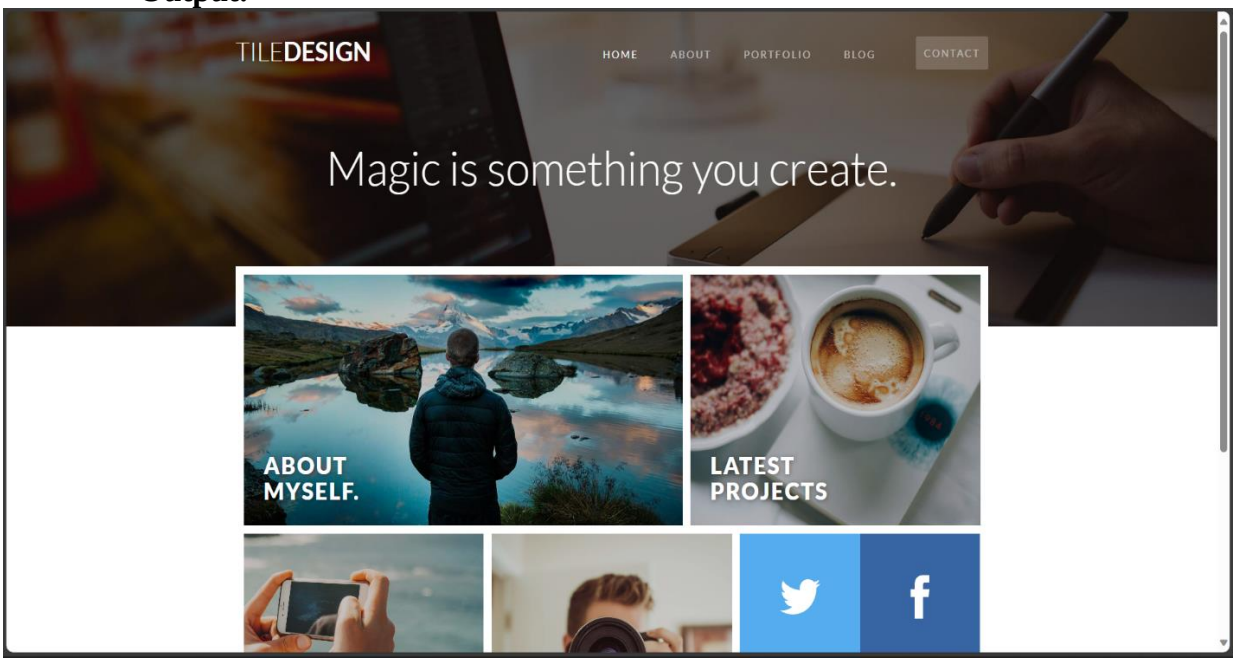

Fig 3.1.2 simple website

- This task of creating website includes the navigation bar, sub navigation, background-image.
- sub navigation list-item open the division which create using table when hover the cursor.
- Creating this I learned more concept of CSS and HTML.

CONTACT PAGE

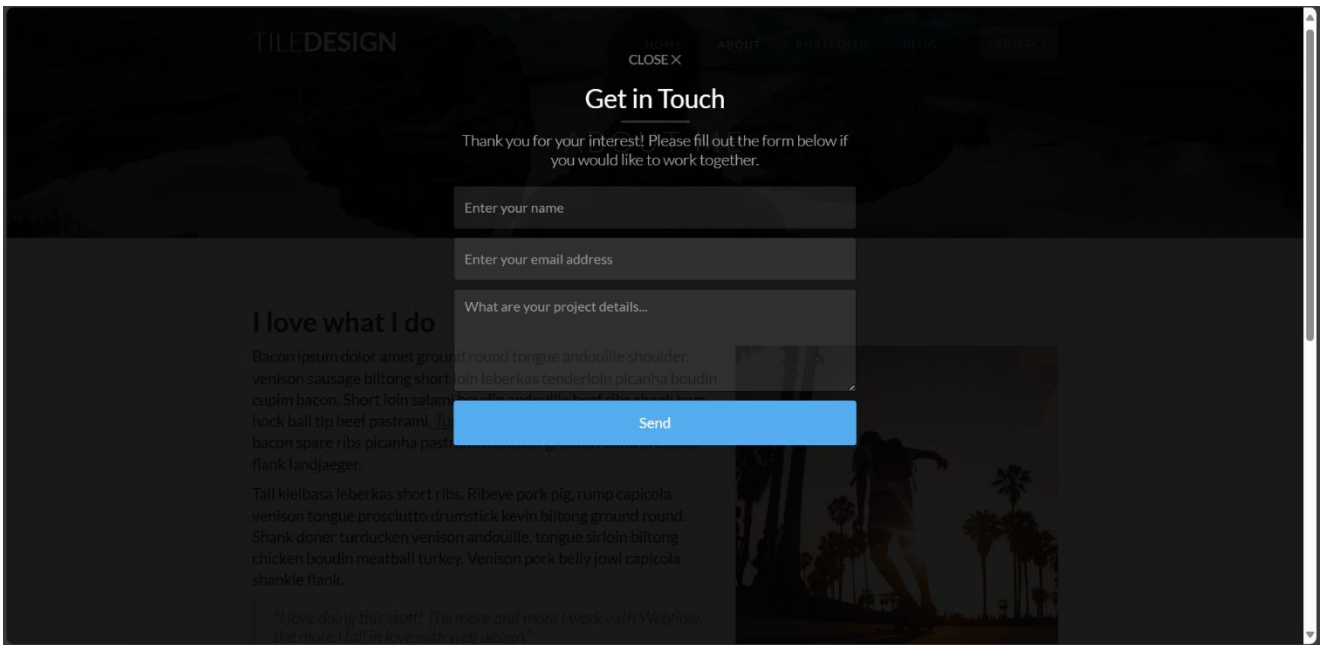

Fig 3.3.3 contact page

- Contact page: This page is designed so that a user can connect to us.

CHAPTER 4: SYSTEM ANALYSIS OF PROJECT

IDENTIFYING PROJECT PROCESS

- The Smilecafe point website is designed using the Figma and adobe app.
- This website allows users to order food or drinks and also book to their table online using their computers, laptops or mobile devices. The smile café point website typically includes features user registration, user authentication and authorization, allowing users to sign up, log in,and manage their ordering and booking etc.
- Simple and user-friendly interface that enables customers to easily order food and drinks online while they can also book their table online.
- The website should allow customers to select desired food or drink and order it at their preferred time.

PURPOSE

- To provide an online platform for customers to order food and drink at their favourable location and time easily and conveniently also user can do advance booking to save their time.
- The website should allow customers to select their food and drink,choose the type of food or drink they need, and delivered it at their preferred time and location and user can do advance booking to save their time.
- The website should also provide real-time information on the availability of food or drink and Tables .

OBJECTIVE

- **Online Platform:** To provide a seamless and convenient online platform for customers to order food or drink and to book their table online.
- **Easy and convenient ordering process:** Simple and user-friendly interface that enables customers to easily order food and drinks online and book their table online.
- **24/7 customer support**

PROBLEM AND WEAKNESS OF PROJECT PROCESS

- Scalability: Depending on the complexity and size of the website, the current system may not be able to handle a large number of users or bookings or orders. This could result in slow performance and/or system crashes.
- Security: As the app includes features such as user authentication and authorization, it is important to ensure that the system is secure and protected against potential cross-site scripting attacks, and unauthorized access.

CHAPTER 5: SYSTEM DESIGN / IMPLEMENTATION

OUTLINING THE PROCESS

- Visit the smile café point: Visiting the smile café point website on your web browser.
- User registration: The user creates an account on the app by providing their personal information such as name, email, and password.
- User authentication: The user logs in to the app using their email and password or through social media logins.
- Add your Desired food or drink to cart or book your table online: Once you're logged in, add your desired food or drink to cart or book your table online to save time.
- Receive confirmation: Once you've confirmed your booking or ordrer, you will receive a confirmation message or email from the website.
- User feedback: The app allows users to provide feedback on their experience, which can be used to improve the app's functionality and user experience.

HOME PAGE

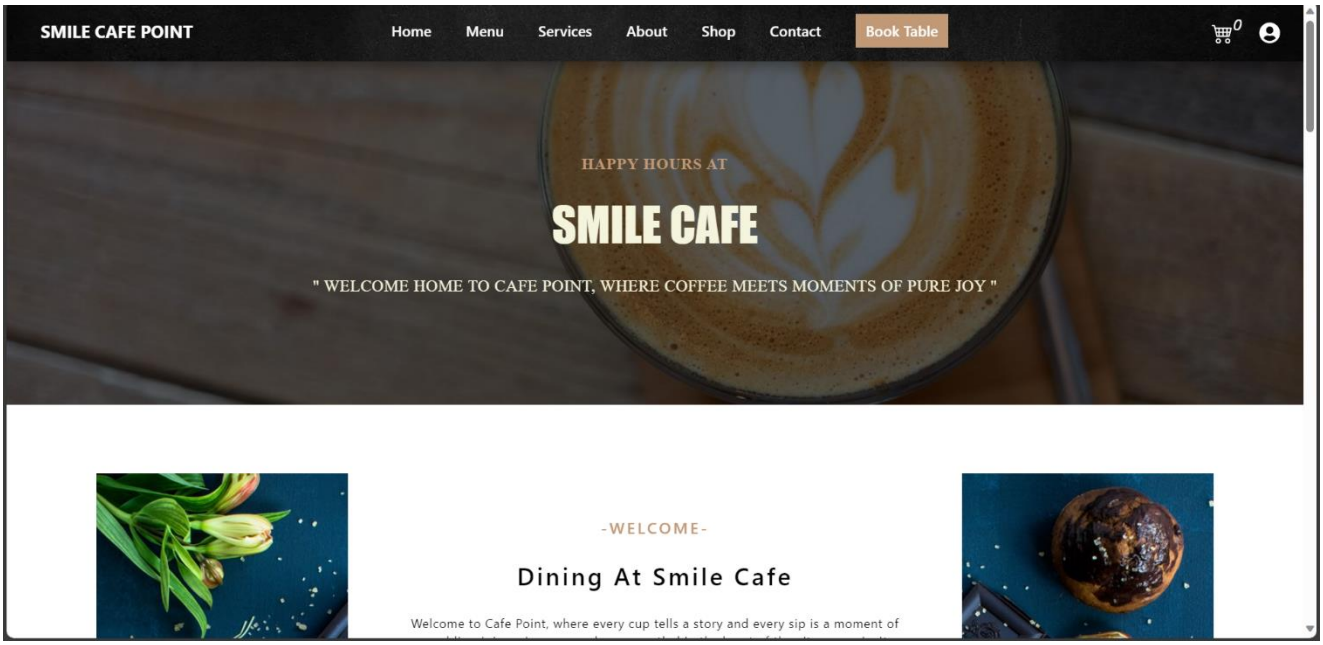

fig 5.1.1 Home Page

- Home Page Component include many components

Other Component of Home Page

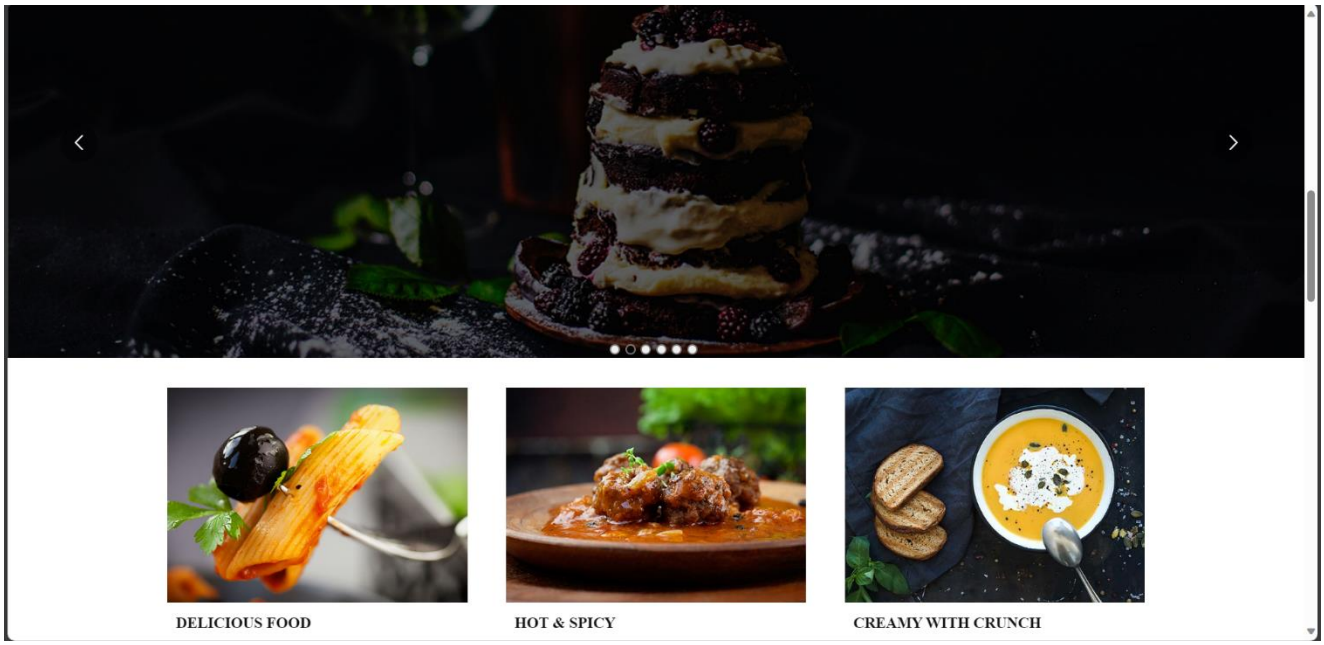

Fig 5.1.2 Home page component

- This Component show the types of food and drink available on website.
- This food and drink card gives information about types of food & drink.

User Login and Register form

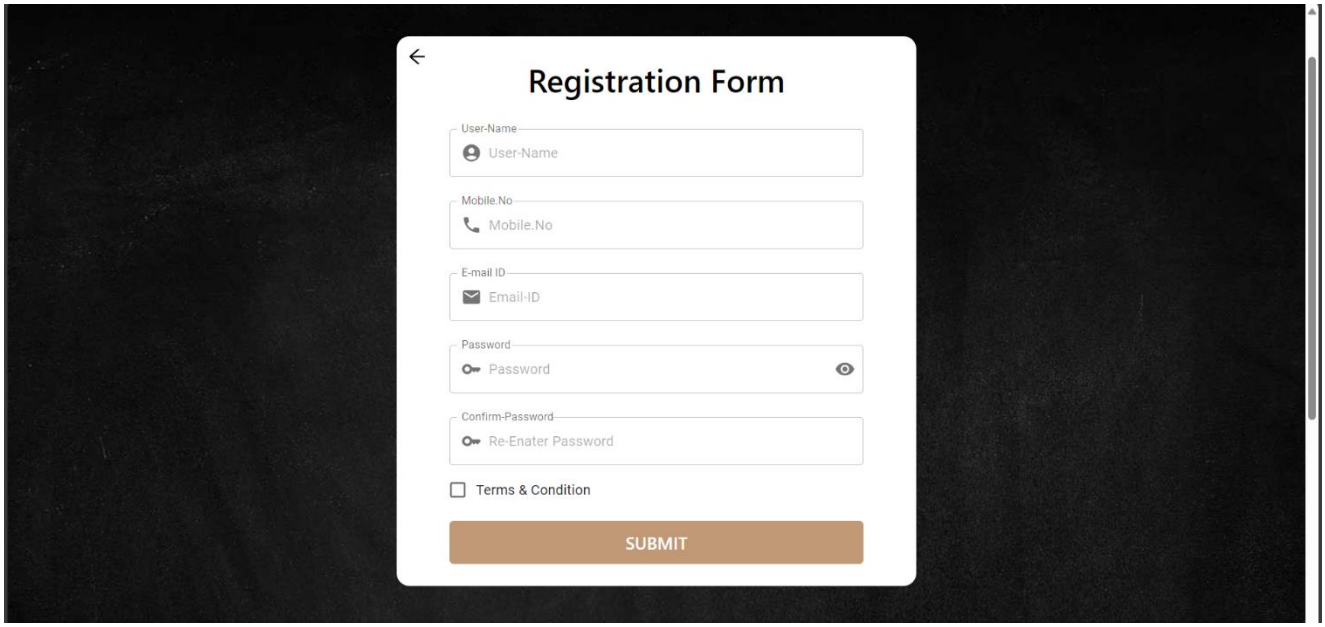

Fig 5.1.3 registration Form

- User account creation: The app should allow users to create an account with their email address. This can help users save time when making future orders, as their personal information will already be stored in the website.
- Before login user can redirect on the register page.

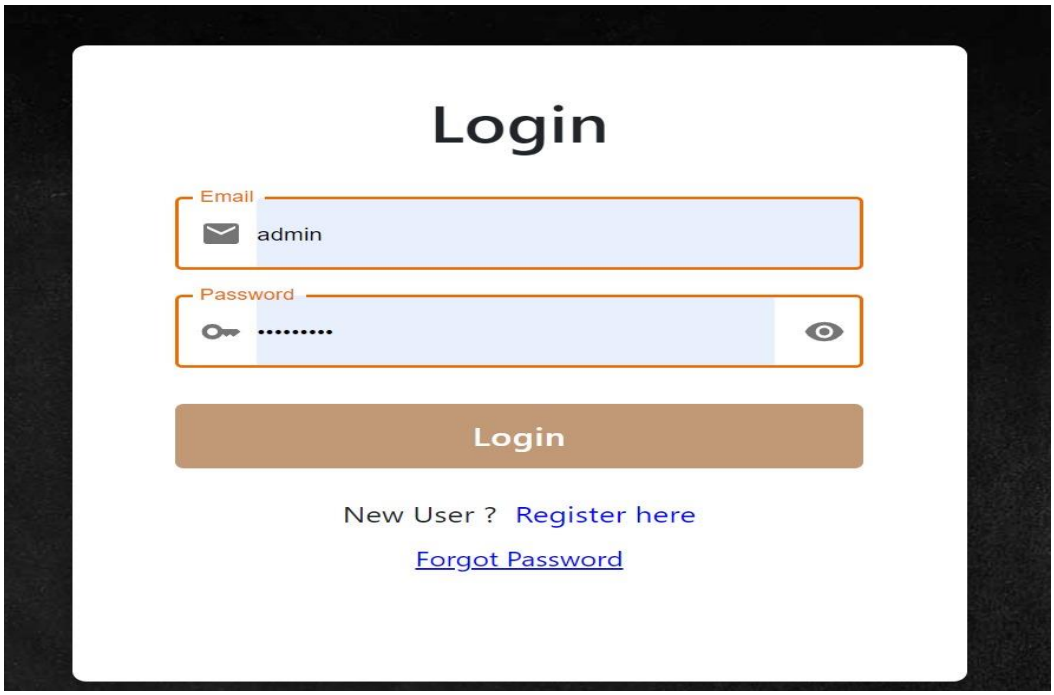

Fig 5.1.4 login page

If the User has already registered then they can login via their email and password on this website

BOOK TABLE PAGE

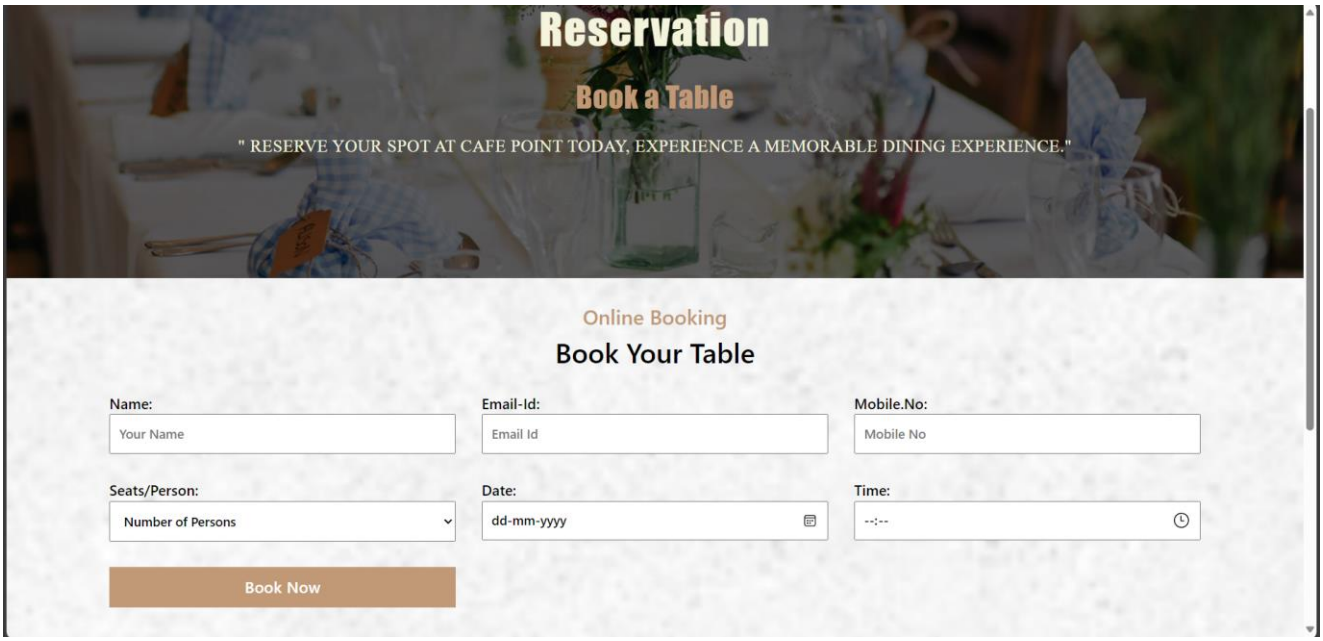

fig 5.1.5 book Table page

- Book Table Page: This page is designed to allow user to book their table online .
- For booking table user have to add Personal details like Name, Email id, Mobile Number.
- Using BOOK NOW button the user can confirm their booking .

ABOUT US PAGE

The Smile cafe Point website responsive in all devices such as mobiles, laptops,and Tablets. By using media query this was possible.

CHAPTER 6: TESTING

TESTING STRATEGY

A testing strategy is a systematic approach that outlines the testing approach, methodologies, tools, and resources required to verify the functionality, performance, and quality of a software application.

UNIT TESTING

Unit testing involves testing individual units of code, such as functions or classes, in isolation to ensure they are functioning correctly. The goal is to identify and fix bugs early in the development process. Unit tests can be automated, and test frameworks like Jest or Mocha can be used for this type of testing.

INTEGRATION TESTING

Integration testing verifies that the different components of the app are working together correctly. This type of testing is done after unit testing and involves testing the interaction between components. Automated testing tools such as Cypress or Selenium can be used for integration testing.

PERFORMANCE TESTING

Performance testing ensures that the app can handle a high volume of traffic and requests without slowing down or crashing. This type of testing is done to identify bottlenecks in the system and optimize its performance. Tools such as Load Runner orJMeter can be used for performance testing.

CHAPTER 7: CONCLUSION

ANALYSIS / SUMMARY OF INTERNSHIP

- To summarize, this internship was a very fruitful one. During my internship, worked on designing a online food and drink ordering website. This website allows users to order food or drinks and also book to their table online using their computers, laptopsor mobile devices. The smile café point website typically includes features user registration, user authentication and authorization, allowing users to sign up, log in, and manage their ordering and booking etc .As well as I worked on other website called Habittt ,this website is designed using the Figma and adobe app. Habittt is online lamps ,chairs ,tables, etc ordering website.

- To achieve this, I used designing studio called Figma and designed both of the website.
- Throughout the designing process, I had to learn to effectively communicate my design and I learned how to describe a design from the user's perspective and designer's perspective This helped to ensure that the appwas functioning as expected and provided a seamless user experience.
- Overall, my internship on the web designing allowed me to gain valuable experience in designing web application using modern technologies. I am confident that the app I designed provides seamless experience to users, and I am proud of the work that I have accomplished during my internship.
